Fineline Fracture Panel – Butter

Tracks Fracture Panel – Denim

Designs

Finishes

- Available in all FilaSorb™ colors (see page 88)
- Custom patterns and sizing available

Technical

- Dimensions – 1220 x 2760mm
- Thickness – 12mm
- NRC – 0.45 - 0.85 (200mm air gap)

Fracture Tiles

FilaSorb™ 12

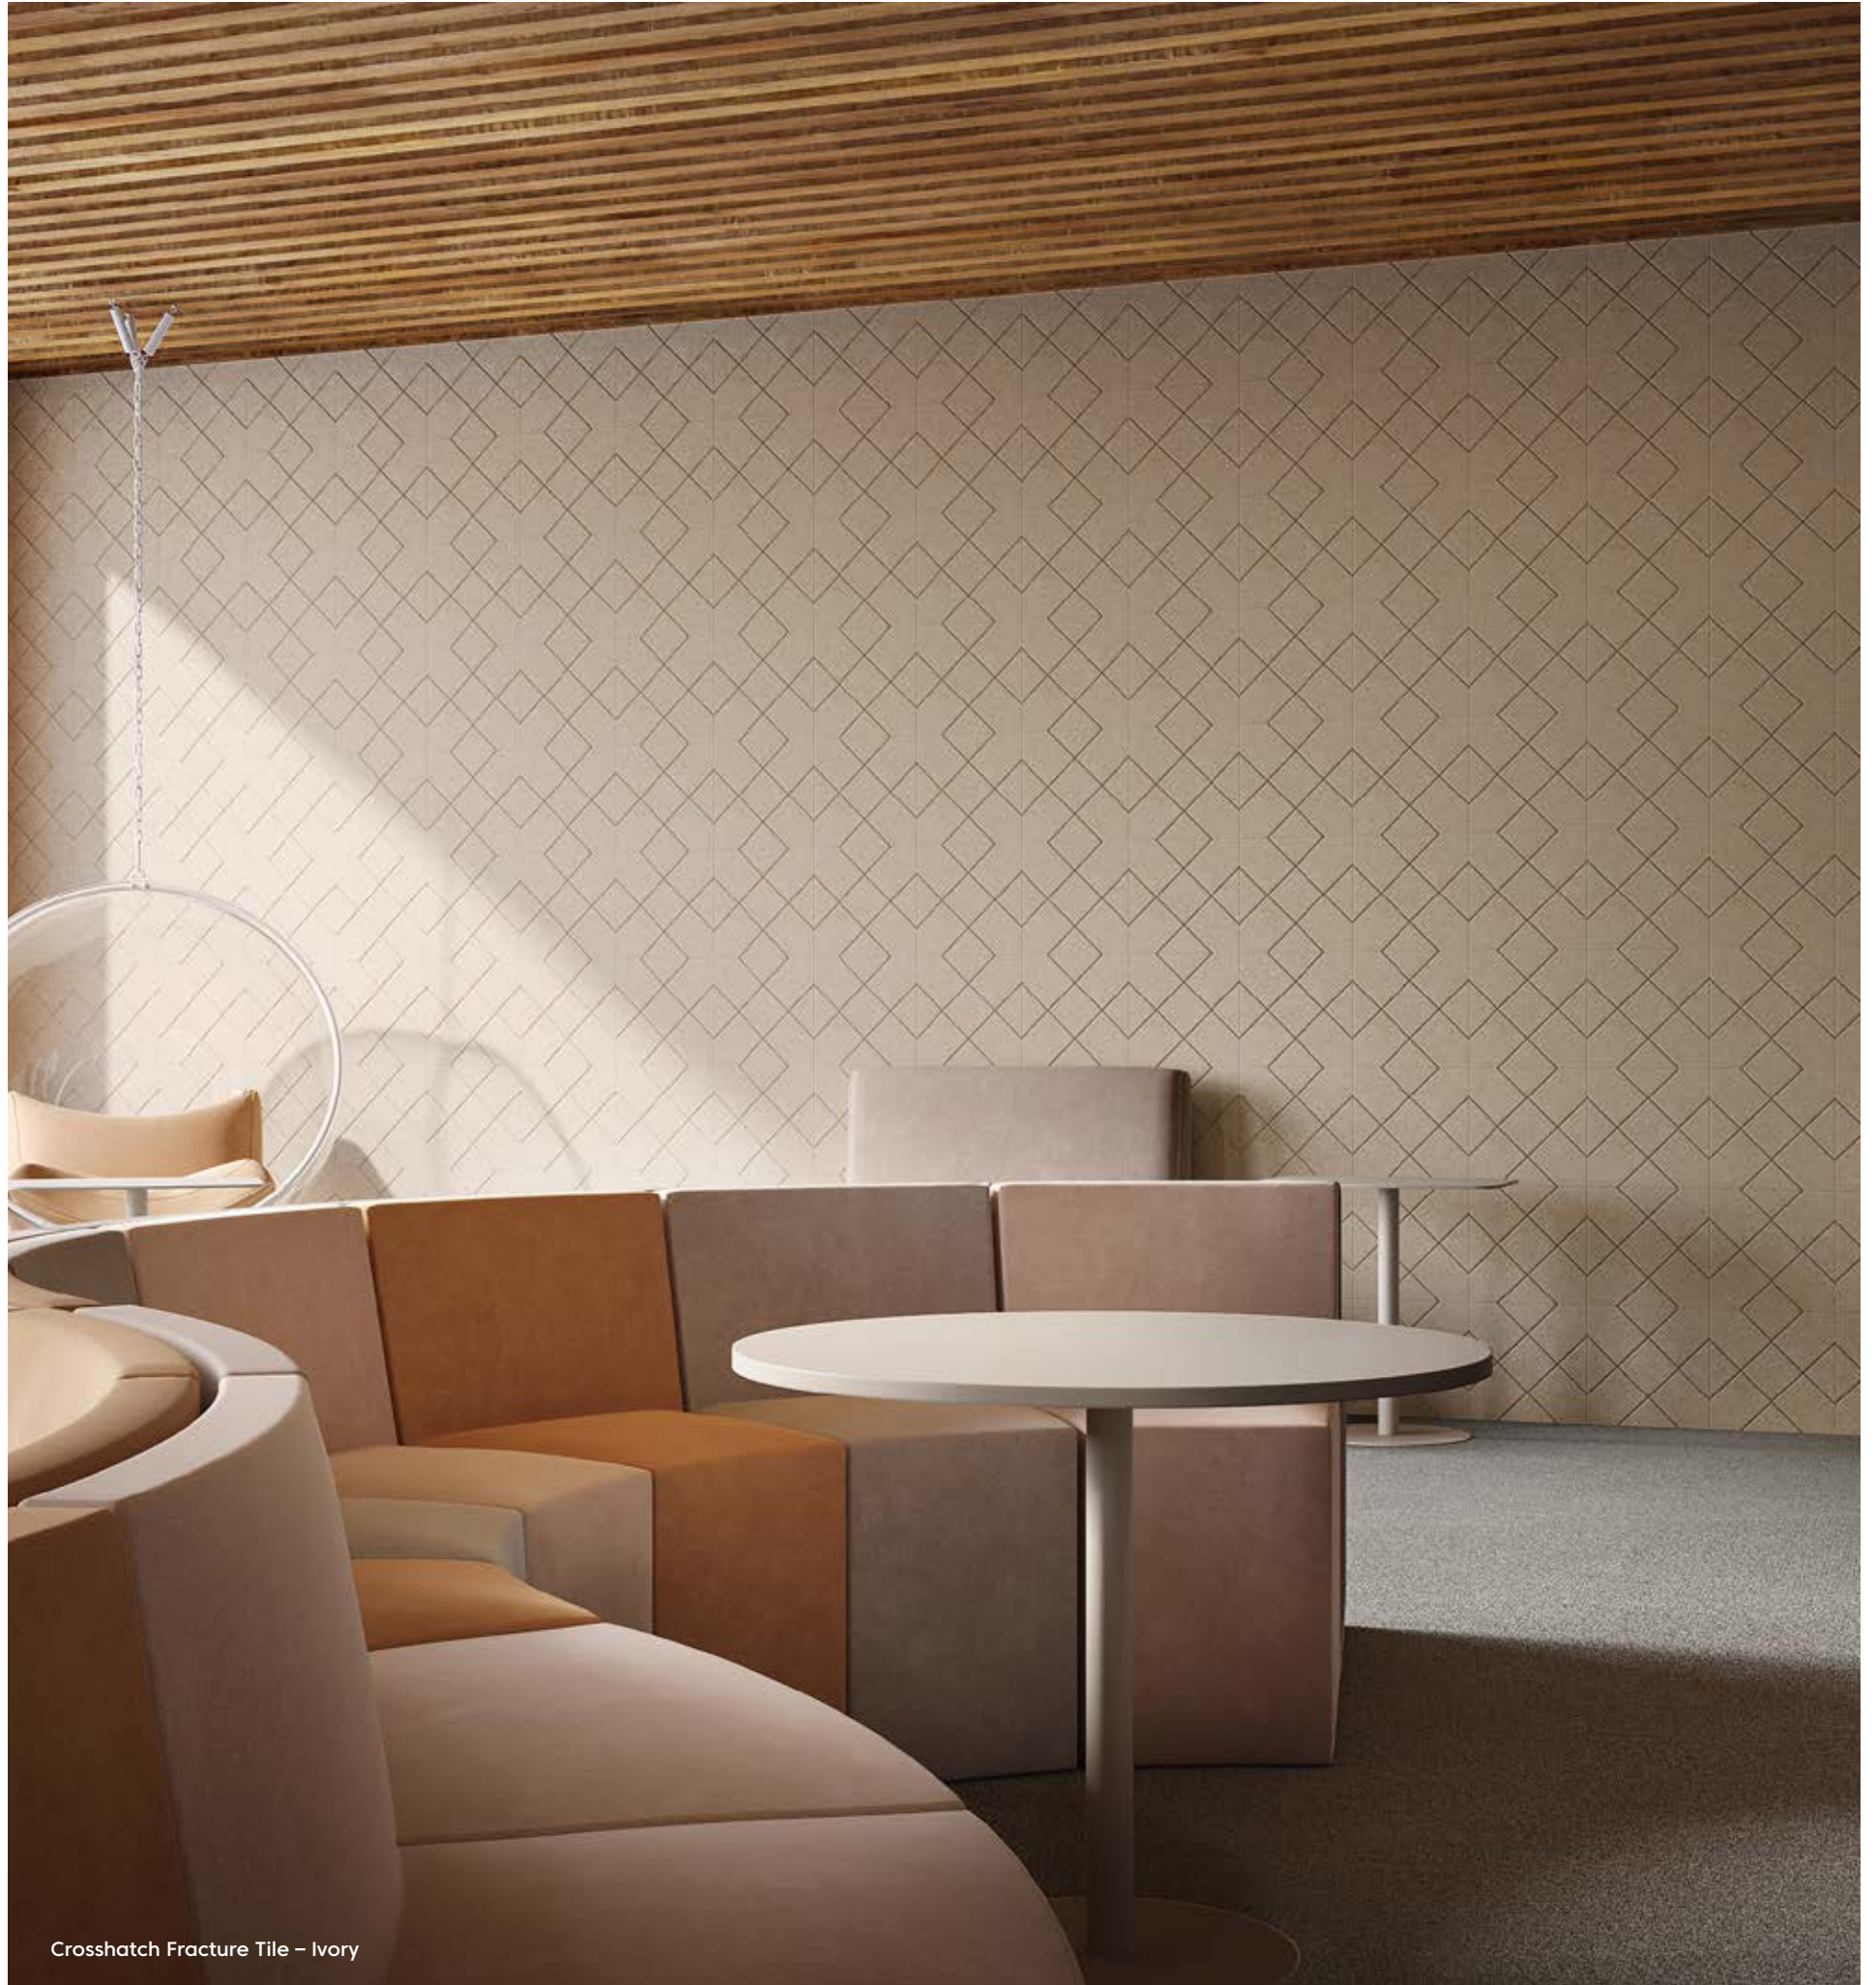

Fracture tiles are a modular acoustic tile made from FilaSorb™ material, designed for installation flexibility and pattern versatility. Linear and circular designs are carved with a bevelled groove into square and rectangular tiles. When installed together, tiles can be grouped to create a number of spectacular full-scale patterns of depth, shadow and texture.

Swell Fracture Tile – Slate

- Dimensions – 1180 x 2780mm
- Thickness – 14mm
- NRC – 0.45 - 0.85 (200mm air gap)

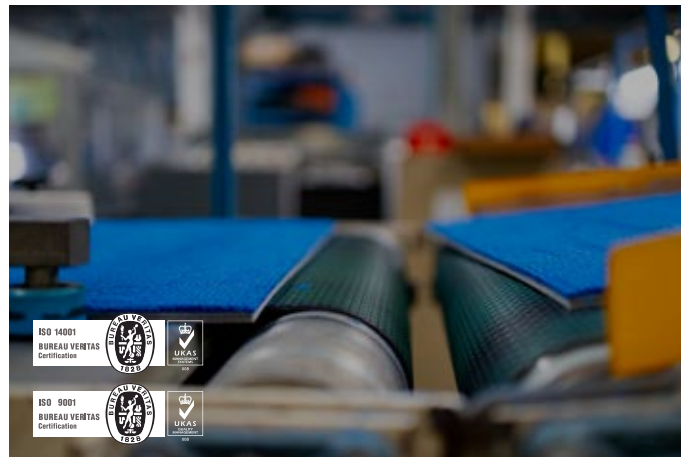

A man and a young girl are seen from behind, holding hands and looking out over a vast landscape at sunset. The sun is low on the horizon, casting a warm, golden glow across the sky and the silhouettes of several wind turbines in the distance. The foreground is a grassy field with some small red flowers. The overall mood is peaceful and hopeful, suggesting a sustainable future.

Building a
sustainable
footprint.

Helping you meet your green building goals

Humanising Quiet is the interweaving of environmental sustainability, human wellness and safety into every project we take on, in our global vision to create more productive and conducive, working and living spaces for humans.

Our Initiatives

Manufacturing to International Standards

Assessed against International Standards of ISO 14001 and ISO 9001, our manufacturing processes deliver quality, high-level service and products, while reducing our impact.

Powered by solar

The use of solar panels attached to our key factory locations also means that your favorite acoustic products, including our FilaSorb™ felt and QuietBack™ carpet tiles, are generated using around 30-40% onsite renewables – powered by the sun.

Environmental Labels

To support green building projects and material transparency, we offer environmental labels across our products. Our eco label certifications indicate that our products are safe for people and the planet, and can be used to qualify toward green building ratings.

Carbon footprint tracking

To deliver on our mission, 2023 will mark the commencement of our third-party carbon footprint audit, conducted across all areas of the global business. This will help us to set goals for the future, measure and benchmark effectively.
