WoodBeQuiet™ Planks

FilaSorb™ 12

WoodBeQuiet™ acoustic planks are printed to appear like real wood using a high resolution printing technique. Planks are made from a minimum of 60% recycled content, and are produced in a standard dimension of 200mm x 1000mm. Each of the 15 planks within a set features a unique wood grain print for an authentic finish.

Finishes

- Available in all WoodBeQuiet™ prints (see page 92)
- Peel & Stick backing available

Technical

- Dimensions – 200 x 1000mm
- Thickness – 12mm
- NRC – 0.45

A man and a young girl are seen from behind, holding hands and looking out over a vast landscape at sunset. The sun is low on the horizon, casting a warm, golden glow. In the distance, several wind turbines are visible on a hillside. The foreground is filled with tall grass and small red flowers. The overall mood is peaceful and hopeful.

Building a
sustainable
footprint.

Helping you meet your green building goals

Humanising Quiet is the interweaving of environmental sustainability, human wellness and safety into every project we take on, in our global vision to create more productive and conducive, working and living spaces for humans.

Our Initiatives

Manufacturing to International Standards

Assessed against International Standards of ISO 14001 and ISO 9001, our manufacturing processes deliver quality, high-level service and products, while reducing our impact.

Powered by solar

The use of solar panels attached to our key factory locations also means that your favorite acoustic products, including our FilaSorb™ felt and QuietBack™ carpet tiles, are generated using around 30-40% onsite renewables – powered by the sun.

Environmental Labels

To support green building projects and material transparency, we offer environmental labels across our products. Our eco label certifications indicate that our products are safe for people and the planet, and can be used to qualify toward green building ratings.

Carbon footprint tracking

To deliver on our mission, 2023 will mark the commencement of our third-party carbon footprint audit, conducted across all areas of the global business. This will help us to set goals for the future, measure and benchmark effectively.
